

Software Engineer with 3+ years of experience designing and scaling secure, multi-tenant web applications using Java, Spring Boot, and Angular. Delivered 12+ production features, optimized APIs with up to 3× performance gains, and supported platforms used by 10,000+ active users.

SKILLS

Languages	:Java, JavaScript, TypeScript
Backend	:Spring Boot, Spring Framework, Spring MVC, Hibernate, Spring Security
Frontend	:Angular, React, HTML, CSS, Tailwind CSS, Thymeleaf
Databases & Caching	:PostgreSQL, MySQL, MongoDB, Redis
DevOps & Tools	:Docker, Maven, Git, Tomcat, JUnit, Postman, Agile, Scrum
Reporting & Utilities	:JasperReports, Apache POI, GoJS

WORK EXPERIENCE

Software Engineer <i>Arollo Tech Limited</i>	Mar 2024 - Present <i>Baridhara DOHS, Dhaka</i>
--	---

- Enhanced key modules of [click-n-manage.com](#), a multi-tenant, multilingual ISO certification platform used by 60+ European organizations, improving scalability, performance, and tenant isolation.
- Implemented multilingual (i18n) support for French, German, and Chinese across 8+ application modules, including CJK font rendering in JasperReports PDF exports, DB migration scripts for 50+ locale entity, and Unicode conversion utilities.
- Developed database trigger scripts with null-safety validation to enforce tenant-level data isolation and prevent cross-organization data leakage in a multi-tenant environment.
- Designed and engineered an application-wide audit logging system covering 300+ database tables, capturing complete CRUD history across major modules through controller-level add, update, and delete operations.
- Optimized legacy REST APIs, reducing mobile app load times by up to 3× and improving API throughput across multiple features.
- Built an AI-powered CLI tool that monitors Bitbucket pull requests, generates AI-assisted code reviews using Claude, and continuously updates review rules by extracting recurring review patterns and team coding standards from PR feedback, reducing manual review effort by 40%.
- Delivered 12+ production features and resolved 30+ critical bugs across 4 quarterly release cycles in Agile Scrum environments.
- Conducted 50+ code reviews, led PR cycles, and mentored junior engineers, improving quality and reducing post-release defects.
- Collaborated with QA engineers and product owners to deliver 10+ end-to-end features, reducing rework by 20% and accelerating release timelines.

Programming Assistant <i>Southeast University</i>	Nov 2022 - Feb 2024 <i>Tejgaon, Dhaka</i>
---	---

- Worked in the [ums.seu.edu.bd](#) core modules using Angular with lazy loading, supporting 10,000+ active users.
- Reduced initial application bundle size from 13MB → 4MB, improving load speed and performance.
- Implemented JWT authentication, 2FA to secure user accounts and Google Captcha for preventing bot attacks by 95%.
- Developed 3 major LMS components - batch-wise curriculum, advising workflows, and anonymous evaluation forms, streamlining course management for 250+ faculty and 10+ departments.

PROJECTS

Doctors Care — Medical Service Platform Github Demo	Jul 2022 - Oct 2022
--	----------------------------

- Architected core backend architecture with Spring Boot, Spring Security, Hibernate, and MySQL.
- Integrated SSLCommerz payment gateway (sandbox), enabling 99% streamlined and secured online transactions.
- Real-time private chat with WebSocket and implemented email notifications, improving communication efficiency by 90%.

Hotel Operations Management System Github Demo	Dec 2021 - Mar 2022
---	----------------------------

- Created a desktop hotel management system with JavaFX + JFoenix, handling 3 user roles (customer, manager, admin).
- Integrated MySQL via JDBC and automated role-based operations, reducing manual errors by 30%.
- Generated PDF reports with iTextPDF for daily revenue and occupancy summaries.

EDUCATION

B.Sc. in Computer Science and Engineering <i>CGPA: 3.85/4.00, Southeast University</i>	Jan 2020 - Dec 2023 <i>Tejgaon, Dhaka</i>
--	---

ACHIEVEMENTS

Grand Finalist (4th place) — Therap JavaFest 2022	July 2022 - Oct 2022
4th place — SEU Intra-University Programming Contest 2022	Aug 2022

CERTIFICATIONS

Master Generative AI with Java Spring Boot — Udemy (Shabbir Dawoodi)	Mar 2025
Java From Basic to Professional — Pondit (Syed Mainul Hossain)	Nov 2022 - Oct 2023
